

Components

aosenuma · design.md v1.0 · components #164F5B → #208692

The molecules are simple system created by basic elements. Those elements can take many forms such as buttons, inputs, dropdowns and cards.

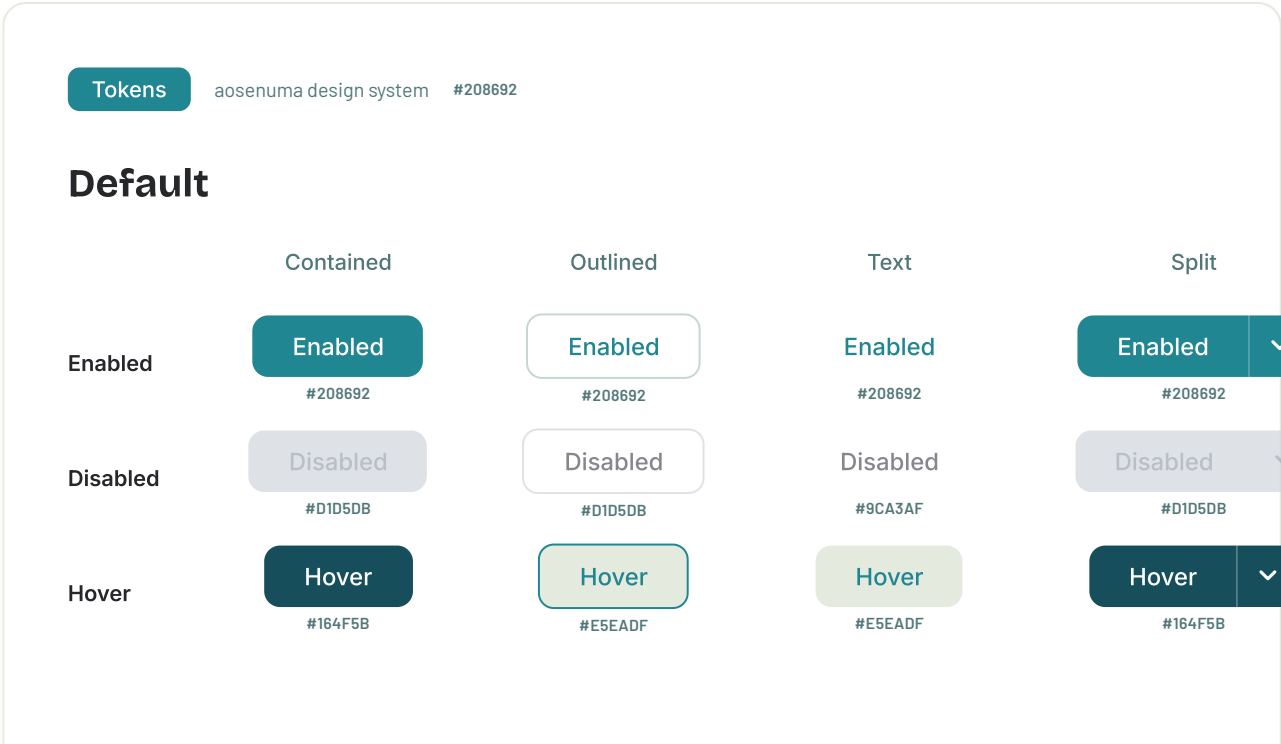

Button Anatomy

Sizing, padding, and touch-target specs. All buttons use 8pt grid spacing. Minimum touch target is 44×44px.

Buttons — State Matrix

Every button variant must have visual specs for all states. Hex codes shown below each button. Per §7.2.
